Detail 7. Construction Joint (Next Day Pour Where Joint Has Eased Shoulders or Has Opened.)

- Metal L strip set in epoxy, shouldered on concrete.*
- Elastomeric joint filler between L strips and epoxy terrazzo floor
- Epoxy adhesive full length of strip.
- Dowel in accordance with ACI 302 or engineer of record to prevent vertical movement.

*If construction joint has not opened, strips may be set back to back.

Option: For "art work areas". See buried contraction joint. Refer to detail 3.

*Care should be taken by concrete contractor to provide a straight joint, placed in coordination with design teams consideration of final grid pattern. Square edges encouraged. Tooled edges discouraged.

Scale: Full Scale 04/09
